

Glensanda Harbour

NOTICE TO MARINERS 03/24

21st March 2024

With immediate effect no person is to walk under the Glensanda ship loading arm while it is in use. This is to protect persons from the potential of injury from material or rollers from falling from the structure.

A suitable safe access route is being planned, which is expected to be in place shortly.

Meantime if you require to pass under the loader arm eg for draft checks, please contact the loader operator and request the conveyor is stopped to allow access, or have a vehicle transport you safely to where you need to be.

This restriction will remain in effect until notified otherwise.

I.F.Henry
Harbour Master
